## CLOSE IN WEAPON SYSTEM (CIWS) TRIALS

*Dear Mr Diwakar,*

1. As you are aware, Field Evaluation Trials (FET) of CIWS by Indian Air Force were conducted in Pokhran ranges during Apr - May 21. I am pleased to state that our system performed exceptionally well in severe weather conditions, especially high temperature and regular sand storms. I would like to acknowledge and place on record my appreciation of the Fibre Optic (FO) cables provided by your company, which enabled unhindered data communication between CIWS elements during trials.
2. Timely availability of FO cable drums along with associated hardware in Pune ensured that my team was well familiarized to handle them. Easy plug and play configuration also enabled quick setting to work of data communication in Pokhran ranges. I also take note of your willingness to depute your engineer to ranges for some minor repairs in one of the cables.
3. I would like to express my sincere gratitude for providing FO cables for trials on No Cost basis. I look forward to engaging with M/s Sasmos CIS for CIWS and other future projects.
